Thomas air compressor model 900-59 can be purchased direct from Grainger Industrial Supply www.grainger.com

Accent Signage Systems, Inc. is the patent holder for the Raster™ Method of Braille, Raster™ Pen, the Auto-Raster™ insertion device, and all other Raster™ products and services.

Auto-Raster™ Deluxe

Braille dispensing and inserting device is an exciting product that completely automates the process of producing Raster™ Braille. The Auto-Raster™ Deluxe works with your current computerized router / engraver, using existing software, to place Raster™ Braille automatically into sign material substrates.

Five times faster than manually placing Raster™ Braille and 15 times faster than routing Braille. Simply drill the holes for the Rasters™, then rerun the program with the Auto-Raster™ Deluxe in place and Rasters™ are automatically dispensed and inserted into the sign material.

Features:

- Easy to install.
- No special software required.
- Fits most existing computerized routing/engraving equipment.
- Different size sleeves available to fit a variety of equipment.
- Air pressure hookup to assist Raster™ movement in dry, static conditions.
- Accommodates uneven materials up to 3/32 inch and still inserts Rasters™ at the correct depth.

The Auto-Raster™ Deluxe makes it easy for you to offer your customers the clean look and feel of Raster™ Braille.
