

START FROM HERE ...

Sign design possibilities are as endless as your imagination. To make the process easier, we have designed five great-looking sign systems for you to adopt, change, incorporate, or simply use as a tool to spark your own creativity.

*Go ahead, be Creative!*

Choose your colors ... your materials ... and your style.

WE'LL PROVIDE THE ELEMENTS TO MAKE  
A GREAT SIGN SYSTEM.

*Let us help you  
put the accent on  
creativity.*

Choose your colors ... your  
materials ... and your style.

*Achieving your design  
is possible through many  
different processes. Whether  
you choose one process, or a  
combination of several,  
Accent Signage Systems,  
will be able to accomplish  
your vision beautifully.*

## START FROM SCRATCH ...

Select from a variety of processes, materials, shapes, and frames. As your wholesale sign producer, Accent's vast experience in the sign business can help you bring the project together.

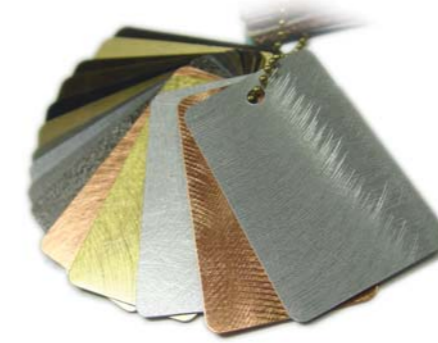

### Processes:

- **Digital Printing** – Your high resolution, vibrantly colored graphics can be reproduced perfectly with UV-stable ink on white or dark materials.
- **Applied Text and Graphics** – Meet the most stringent ADA requirements for tactile text. Give dimension to a logo or graphic image.
- **BondText™ Inlaid Text** – When you need tactile text in its most secure form, you will find Accent's BondText™ is impossible to remove.
- **Subsurface Routed Text & Graphics** – Add extra depth and dimension to your signage.
- **Raster™ Braille** – The best-looking, easiest reading, most ADA-compliant signage. Raster Braille can be incorporated into almost any material, making your design options unlimited.
- **Applied Vinyl Text and Graphics**
- **Hot Stamping** – Metallic accents or logos to emphasize or enhance your designs.

## MATERIALS

Applied text and Raster™ Braille allow you to incorporate sign materials that compliment the design of the interior environment.

- Engraving Stock
- Acrylic
- Metals
- Laminates
- Wood
- Stone
- Solid Surface Material (e.g. Corian®)

## SHAPES

Create any shape and size.

## FRAME OPTIONS

Whether you visually frame a sign or use the frame as a hidden component, the simplicity and ease of replacing, removing, or updating makes a frame worth twice the price.

- **Aluminum Frames** – Accent's Series 100 (thin profile) and Series 200 aluminum frame are available in silver, gold, and black.
- **High Impact Styrene Frames** – Available in more than 19 standard sizes, 7 standard colors, and square or round corners. Also available in custom colors.
- **Curved Frames**
- **Mounting Hardware** – Accent carries all the mounting hardware your project might require.

## CUSTOMER SERVICE

Fast, friendly service is only the beginning. We've been in the interior sign business since 1984, and are experts in ADA signage. It's so easy to work with Accent. Call for a quote. Your project will be done on time and on budget.
