Expand Your Capabilities

If you are a sign company looking to expand into the interior signage market, or a shop that needs help with special projects and overflow, look to Accent Signage Systems, Inc. to produce your wholesale interior signs.

Quick Turn-A-Round

We have the ability to handle large projects and ship them to you fast when you need it. We stock a wide variety of sign material, from frames to an assortment of substrates. We can cut, bend, hot-stamp, engrave, or otherwise custom fabricate material to your specifications. We can digital print high-resolution images onto almost any substrate with amazing results.

ADA Expertise

ADA laws can be difficult to comprehend. At Accent we understand how frustrating this can be. Our ADA experts keep current with the latest government laws and regulations to better serve our customers.

Need Technical Consultation?

Each project is unique and requires its own solutions regarding production methods, sign materials, frame usage, type fonts, etc. Let our production expertise compliment your sign shop projects.

Contact us today to see how we can help you provide your clients with great-looking interior signage.

SIGNAGE SYSTEMS
Digital imaging is literally changing the face of interior signage. With high resolution photo-realistic printing, rich colors, durable prints on almost any material, digital imaging can transform your interior signage. Replacement signs are quick and easy and *match the originals . . . first* time, every time.

Your Sign Shop Just Got a Whole Lot Bigger.

Now you can provide your clients with interior signs and name badges featuring rich, clear, digital images. Accent Signage Systems, Inc. is your wholesale partner for digital printing with a reputation for quality, service, and dependability.

We offer stunning high-resolution photo quality digital printing on almost any substrate. Whether it's a logo, photograph, or illustrated graphic, our new process can reproduce the richest colors and most intricate details accurately and consistently, in seven colors of UV-cured ink at resolutions up to 2400 x 1200 dpi.

We can print on plastic, glass, metal, wood, or almost any substrate. We can even print opaque white behind an image on dark materials, allowing for effects that weren't possible until now.

Need to add or replace a sign? Our color management expertise and consistent color reproduction ensure that your new signs will match the original signs now and in the future.
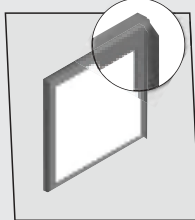

This new technology can easily be incorporated with raised tactile letters, Raster® Braille, and non-glare backgrounds for full ADA-compliance.

Put digital imaging to work for you today. Contact us for more information.

![ACCENT SIGNAGE SYSTEMS]

This popular frame system has proven itself in the marketplace for the past 10 years as a good-looking, flexible, and cost-effective system.

Ideal for interior signage use:
- ADA Room Signs
- Directories
- Displays
- Menu Boards
- Directional Signs

Standard colors:
black or silver

Aluminum Frames

The Aluminum Frame System incorporates many of the features of our popular High-Impact Styrene Frames and adds an exciting choice of metal finishes and custom sizing all at an affordable price. The frames are lightweight, durable, and provide a clean finished look to the sign with no raw edges or mounting methods visible. The sign inserts fit securely into the frames for tamper-resistant signage.

Aluminum frames have a satin anodized finish and are available in black or silver. Custom colors and finishes are available.

Features:
- Custom sizing
- Lightweight and durable
- Frames can accept a variety of substrates; aluminum, plastics
- Sign inserts are easily changeable and can be modular
- Concealed mounting
- Easy installation with either screws, tape, or velcro
- Easy sign removal for building maintenance such as painting walls.

Two Edge Styles:

100 Series
Features a thin edge with the sign insert recessed into the frame.

200 Series
Features a 3/16 inch radius edge design that matches our High-Impact Styrene Frames and a front reveal that allows the sign insert to have a slightly recessed appearance.

800-869-7800

Aluminum Frames

Aluminum frames incorporate "picture frame technology" for incredible flexibility with unlimited sizing. Pre-cut lengths are stocked in many sizes for quick assembly. Custom sizes are available at no extra charge.

NEW FRAME DESIGN
Two edge styles are available:

100 Series
Features a thin 1/16 inch edge. The sign insert fits recessed into the frame using our exclusive snap lock mechanism.

200 Series
Features a 3/16 inch radius edge design that matches our High-Impact Styrene Frames and a front reveal that allows the sign insert to have a slightly recessed appearance. The sign face fits into the frame using our exclusive snap lock mechanism.

SUPPORT BRACKETS
Support brackets are available for use with larger signs and when modular sign inserts are used. Support brackets are available in all frame sizes.

COLORS
Available in black or silver with a satin anodized finish. Custom colors and finishes are available and subject to minimum order requirements.

SNAP LOCK MECHANISM
Each snap lock has a pressure sensitive adhesive tab to hold the sign face securely in place within the frame and provide tamper-resistant signage. Snap locks allow for easy sign face insertion, removal, and replacement.

MOUNTING
Frame back is designed for tape concealment. Mounting holes can be added to accommodate standard hardware for various types of installations.

Simple one-color to complex multi-color . . .

We do it all. At Accent Signage Systems, Inc. we offer a wide range of fabrication services, from hot-stamping to digital printing to engraving, all at very competitive prices.

We understand your need for a distinct look for your badges, so we offer a variety of fabrication methods, colors, materials, and hardware to choose from. Whether you require one-color or multi-color imprinting; traditional rectangular shapes or custom shapes; we provide quality products and exceptional service.

COMMON BADGE TYPES AVAILABLE:

- Hot-Stamped Badges
- Engraved Badges
- Digital Printed Badges
- Custom-Shaped Badges
- Metal Badges
- Molded Badges
- Pocket Badges
- Military Badges

We offer personalized service, fast quotes, and quick turnaround.

Our customer service personnel can help with technical support, badge size, logo placement, best imaging methods to fit your needs, as well as, material and hardware selection.

Let Accent Signage Systems, Inc. be your wholesale source for all of your custom name badge needs.

Name Badges

Available in just about any custom size or shape you desire.

MATERIAL
Choose from a variety of colors and finishes. Badge materials include 1-ply or 2-ply engraving substrates and premium solid brass.

EDGE FINISHES AVAILABLE
1. Square Corner with Beveled Edge
2. Radius Corner with Straight Edge
3. Radius Corner with Beveled Edge

HOT-STAMPED LOGOS & GRAPHICS
Hot stamping is a dry print method using heat and pressure to impregnate colors onto a material substrate (such as plastic). Whether your hot-stamped image is a simple one-color design or a more complex multi-color design, we can provide exceptional quality with our hot-stamped badges. Choose from a large selection of glossy and matte hot-stamp colors, as well as high luster metallic gold and silver.

DIGITAL PRINTING
Multi-color badges just got a whole lot easier. Photographic quality photos, logos, or illustrations can be digitally printed directly onto any material substrate with amazing quality. Digital printing uses ultra-durable UV-cured inks with resolutions of 2400 x 1200 dpi to produce rich colors with ease.

ARTWORK
The finished quality of your printed logo is dependent on the quality of the artwork supplied. Artwork charges may be necessary if additional time is required to bring artwork up to acceptable standards.
EPS vector graphics, high-quality photo files (for photographic images) produce the best results. Contact us for more information.

BADGE HARDWARE
We have a variety of badge fasteners to choose from including: pins, magnets, and clips. Metal fasteners are nickel-plated brass so they will not tarnish or discolor fabrics.
